Lithium-ion batteries are also more expensive to produce, as they can cost nearly 40% more to produce than nickel-cadmium batteries. Competitors. Lithium-ion faces competition from a number of alternative battery technologies, most of which are in a development stage. One such alternative is saltwater powered batteries.

Like most laptops, Dell laptops use lithium-ion batteries. One type of lithium-ion battery is the lithium-ion polymer battery. Lithium-ion polymer batteries have increased in popularity in recent years and have become standard in the electronics industry due to customer preferences for a slim form factor (especially with newer ultrathin laptops) and long battery life.
