

What is New Caledonia's energy policy?

As a country of Oceania, one of the parts of the world most impacted by climate change, New Caledonia wishes to be exemplary in terms of energy policy. Building on the Paris Agreement, the Congress of New Caledonia adopted the Energetic Transition Scheme of New Caledonia (STENC) in June 2016. The scheme has three main objectives for 2030:

What is New Caledonia's main energy source?

New Caledonia depends on imports for 96% of its energy needs, mainly used in mining operations. Imports of coal and oil products remain the main energy sources of the territory.

What is the New Caledonia energy transition scheme?

Guided by the Agence Calédonienne de l'Energie (ACE), the New Caledonia Energy Transition Scheme (STENC) defines the island's energy policy up to 2030.

Why is New Caledonia so vulnerable?

The dependence and size of New Caledonia's market compared to larger countries in the Asia-Pacific zone makes the island very vulnerable in terms of energy supply - an unnecessary level of dependence considering the local renewable resources that could be exploited on the island.

What is New Caledonia's economy like?

New Caledonia's economy is one of the most dynamic in French overseas territories, which is particularly related to underground resources: New Caledonia holds between 20% and 30% of the world's known nickel reserves. High productivity = high dependence?

How can the Caledonian authorities improve energy security?

Vulnerable in terms of energy, the Caledonian authorities are thus seeking to become less dependent on external energy sources and to improve the competitiveness of the territory. There is room for improvement as only 12% of electricity production comes from renewable sources.

This represents 0.01% of global energy consumption. New Caledonia produced 3,731,265,000 BTU (0.00 quadrillion BTU) of energy, covering 5% of its annual energy consumption needs. Non Renewable (Fossil Fuels) Energy Consumption. 95% . ...

Akuo has been able to support this ramping up of New Caledonia's renewable energy issues by winning two separate calls for tender - 35 MW of solar and 30 MW of wind - located in the ...

Present in New Caledonia for more than 20 years, Total Quadran is the leading local independent producer of 100%-renewable electricity. It manages 7 solar power plants with a cumulated capacity of 50 MWp. Nearly 140,000 residents of New Caledonia use the clean energy produced by Total Quadran. Total and Low-Carbon

## Electricity

Sustainable Development Goal 7: Energy Indicators (2016) Renewable energy (% of TFEC) 4.0 Access to electricity (% of population) 100.0 ...
