

How does Alfen energy storage work?

The additional integration of an Alfen energy storage system allows full mitigation of peak loads, allowing maximum output at each charging point, and storage, and optimal consumption of, locally generated renewable energy. Fast charging of EVs is increasingly creating stress on the electricity grid.

What are Alfen's energy storage solutions?

Alfen's energy storage solutions are underpinned by two key products: TheBattery Elements and TheBattery Mobile. These products are tailor-made for different markets and applications but based on the same design principles to guarantee optimal performance, flexibility, modularity and longevity.

Can Alfen be relocated?

Offering maximum flexibility it can be relocated, as desired, to any site with an immediate demand for fast EV charging. Alfen combines its energy storage system and smart grid experience to equip fast charging stations with peak shaving capability.

Where can Alfen's mobile storage system be implemented?

Alfen's mobile storage system can be implemented absolutely everywhere. See how TheBattery delivers green energy in the Port of Rotterdam. TheBattery Connect is Alfen Connect's module used as an energy management system for Alfen's energy storage solution, TheBattery.

Does Alfen make EV charging equipment?

Alfen also makes EV charging equipment and smart grid infrastructure such as substations and transformers for solar PV power plants. Alfen has been contracted to supply a battery energy storage system (BESS) in Sweden for electricity network company Ellevio.

Does Alfen have a mobile battery storage solution?

For those projects, Alfen is deploying its containerised BESS solution, TheBattery Elements, but the company also recently launched a new iteration of its mobile battery storage product called TheBattery Mobile, putting 720kWh of storage capacity into a 10ft container on wheels.

TheBattery Connect is Alfen Connect's module used as an energy management system for Alfen's energy storage solution, TheBattery. Clients are given access to TheBattery, wireless and via their own IT systems, for all storage ...

Alfen battery systems stabilise energy supply in Sweden as Ellevio Energy Solutions invests to support growing renewable generation 22 October 2024 Alfen's ongoing installation of battery storage technologies with Ellevio, one of Sweden's largest electricity network companies, is playing a crucial role in balancing the country's grid. ...

Netherlands-based Alfen is operating internationally in the heart of the energy transition, as a specialist in energy solutions for the future. With its 85-years" history, Alfen has a unique combination of activities. Alfen designs, develops and produces smart grids, energy storage systems, and electric vehicle charging equipment and combines ...

Alfen has been contracted to supply a battery energy storage system (BESS) in Sweden for electricity network company Ellevio, which will be the Scandinavian nation"s biggest project of its type to date.

Alfen"s booth at the EES Europe / Intersolar Europe trade show, Munich, Germany in May 2022. Image: Cameron Murray / Solar Media. Alfen has been contracted to supply a battery energy storage system (BESS) in Sweden for electricity network company Ellevio, which will be the Scandinavian nation"s biggest project of its type to date.

Alfen delivered its 1 MW battery energy storage system "TheBattery" to Engie"s power generation plant in Drogenbos (Brussels). This is the first battery based storage system in Belgium to provide grid stability since the grid operator opened its network for battery systems in May 2017.

Energy solutions integrator Alfen is building a 12MW battery energy storage system (BESS) with black start functionality for co-location with a wind farm in Finland. Netherlands-based Alfen is building the BESS, which it ...

Energy solutions integrator Alfen is building a 12MW battery energy storage system (BESS) with black start functionality for co-location with a wind farm in Finland. Netherlands-based Alfen is building the BESS, which it claims is Finland"s third-largest, for electricity generation company EPV Energy"s Teuva wind farm.

The 20MW/20MWh system will be supplied along with a 10-year service agreement from Alfen, and will be commissioned in Spring 2025. Rabbalshede Kraft plans to add a 30MW solar PV power plant to the site in ...

A roundup of news from Europe, with Alfen and Sermatec deploying BESS projects in Sweden and Bulgaria and new firm terralyr raising EUR77 million for project development and operation, starting in Germany. ... Construction has begun on a 30MW battery energy storage system (BESS) in Finland, developed by Glennmont Partners, local IPP Ilmatar ...

Alfen can make a powerful impact by enabling sustainable energy developments thanks to its smart grids, charging stations for electric vehicles and energy ...

Image: Alfen. Netherlands-based BESS integrator Alfen is providing a 20MWh unit for a wind farm in its home market, in the region of Ooltgensplaat. Alfen has signed an agreement with the Windpark de Plaet plant to install the battery energy storage system (BESS), which the announcement implied will have a power rating of 10MW, i.e. a 2-hour system.

"The first quarter of 2023 was a remarkably strong quarter for our Energy storage systems and Smart grid solutions businesses. 2023 is really the breakthrough year for energy storage for Alfen: the market is expected to grow ~60% in MWh in Europe ...

Alfen is at the forefront of Europe's transition to zero carbon, driven by our mission to create a more sustainable world for future generations. Our roots in the electricity grid are deep. Founded in 1937, our early days focused on manufacturing switchgear and supplying secondary transformer substations to Dutch grid operators. Today our unparalleled expertise spans smart ...

Energy trading. Scholt is an energy supplier to businesses in Belgium, the Netherlands and Germany, and will initially use the storage system for energy trading. Sander Drissen, Business Development Manager at Scholt Energy Services: "This installation provides a sustainable basis for the future and can easily be expanded when necessary.

The Alfen mega energy storage system helps to smooth peaks and troughs in power supply and better match the demand for energy. In this way we are creating more flexibility and stability in the system to facilitate renewable energy. 3 megawatt energy storage system at ...

The powerful combination of Alfen's transformer stations, energy storage systems and charging stations enables the company to strike an optimal balance between decentralised generation and consumption. read more Energy storage solutions. The energy network is becoming increasingly sustainable and more decentralised. ...

The powerful combination of Alfen's transformer stations, energy storage systems and charging stations enables the company to strike an optimal balance between decentralised generation and consumption. read ...

Almere, The Netherlands 22 February 2023 - Alfen, an energy solutions specialist at the heart of Europe's energy transition to limit climate change, and SemperPower, a leading player in the development of independent large-scale energy storage projects in The Netherlands, are excited to launch Project Pollux - the largest battery energy ...

Alfen's energy storage solutions are underpinned by two key products: TheBattery Elements and TheBattery Mobile. These products are tailor-made for different markets and applications but based on the same design principles to guarantee optimal performance, flexibility, modularity and ...

Marco Roeleveld, CEO of Alfen, said: "The first quarter of 2023 was a remarkably strong quarter for our Energy storage systems and Smart grid solutions businesses. 2023 is really the breakthrough year for energy storage for Alfen: the market is expected to grow ~60% in MWh in Europe in utility & commercial storage (source: BNEF).

Alfen, a Netherlands-based provider of electric vehicle (EV) charging, smart grid and energy storage solutions

has reported a 526% increase in half-year revenues for its storage segment. The Euronext Amsterdam ...

Alfen combines its energy storage system and smart grid experience to equip fast charging stations with peak shaving capability. Business cases can be further improved by using the storage for energy trading when capacity is not being ...

Document type: download Alfen Press Release 2024 Q3 trading update. Document type: download Alfen Presentation CMD 2023. Financial reports Capital ...

Given the growth expected within our Energy Storage Systems business line in conjunction with a solid backlog for the second half of 2023, Alfen is maintaining higher stock levels, further supported by strategic stock down payments for batteries, inverters and containers for both the TheBattery Elements and Mobile storage solutions.. Operating cash flow was ...

Alfen is at the forefront of Europe's transition to zero carbon, driven by our mission to create a more sustainable world for future generations. Our roots in the electricity grid are deep. Founded in 1937, our early days focused on ...

Developer Key Capture Energy emailed Energy-Storage.news this week to say that the 20MW project has passed a Quality Assurance Inspection, a requirement needed to qualify for NYSERDA's Bulk Energy Storage Incentive Program.. According to Key Capture, this opens the path to "monetising millions" in state incentives for a project which was brought ...

Alfen is a Netherlands-based company active internationally in the energy storage and smart grid markets. Image: Alfen NV. Netherlands-based Alfen is deploying a two-hour-plus battery energy storage system (BESS) for ...

Alfen supplied a 200kWh energy storage system solution to BAM and Stedin for a renovated neighbourhood in Woerden, the Netherlands. The project is part of BAM's and Stedin's innovative Rennovates project, aimed at developing a society based on smart energy use. This includes zero-energy houses, created by reducing the energy consumption and ...

Alfen has signed an agreement with Vasa Vind that marks its first battery energy storage system co-located at a Swedish wind farm. Alfen will design, engineer, install and commission a 20MW TheBattery Elements energy storage system in connection to one of Vasa Vind's wind farms by the end of 2024. Alfen will also provide a long-term service agreement to ensure the system ...

The additional integration of an Alfen energy storage system allows full mitigation of peak loads, allowing maximum output at each charging point, and storage, and optimal consumption of, locally generated

renewable energy. Fast charging of EVs is increasingly creating stress on the electricity grid. Addressing this requires a combination of ...

Alfen combines its energy storage system and smart grid experience to equip fast charging stations with peak shaving capability. Business cases can be further improved by using the ...
