

How can Singapore improve its energy supply?

This will ensure a more reliable and efficient energy supply as Singapore continues to increase its renewable energy generation. In addition, the vanadium electrolytes required by the large-scale flow battery could be produced from recycled industrial waste, which enhances circularity on Jurong Island.

What is ATP's Privacy Policy?

ATP is committed to protecting your privacy. Our Privacy Policy has been updated to let you know how we collect data to deliver enhanced content and experience on the ATP site, in accordance with the new EU General Data Protection Regulation (GDPR).

What makes Singapore a strong chip industry?

The investments- whether they are in greenfield projects or expansions of existing capacity - have also reinforced Singapore's strength in several segments of the chip industry. They are trailing-edge logic chips, leading-edge memory chips, semiconductor materials, chipmaking equipment and tools, and ATP.

All the main mechanisms of ATP production linked to ADP phosphorylation as well the regulation of these mechanisms during stress conditions and in connection with calcium signalling events are discussed. Since 1929, when it was discovered that ATP is a substrate for muscle contraction, the knowledge about this purine nucleotide has been greatly expanded. ...
