

How much solar power does Austria have?

As of the end of 2022, solar power in Austria amounted to nearly 3.8 gigawatt (GW) of cumulative photovoltaic (PV) capacity, with the energy source producing 4.2% of the nation's electricity.

Will Austria get a solar rebate?

From pv magazine Germany The Austrian PV industry has been patient, but help has finally come. The financing and regulatory framework for solar rebates under the Renewable Energy Sources Expansion Act (EAG) has been enacted, with the 2022 edition of the program scheduled to start on April 21.

How will Austria support solar deployment in 2021?

The new provisions will provide significant support for solar deployment in Austria. "The first agreement between the governing parties on how the energy transition in the electricity sector can be steered with state funds was already in place with the EAG in the summer of 2021.

What is Austria's energy policy?

The energy policy goal in Austria is set with 100% electricity from renewable energy sources by 2030 and climate neutrality by 2040.

Who is responsible for the commissioning of PV systems in Austria?

In Austria, the most important decisions regarding the commissioning of PV systems are the responsibility of the federal states. Even if the national targets are now ambitious - 21 TWh by 2030 and 41 TWh by 2040 - these must now be realised at state level.

How many natural gas power plants are there in Austria?

There are currently 16 natural gas power plants in Austria and 3,4 GW power made by pump hydro storage powerplants. E-Control is the regulatory authority in Austria responsible for the electricity and gas industry. The TSO and the larger DSO's are mainly owned by the federal and regional governments.
