

Is a whole home battery backup system worth it?

You'll need about three times as much power for a whole home backup system, which is about three times the price of a partial home setup. Partial home battery backup systems generally make more sense for the average American home, but a whole-home setup may be worth it if you live in an area with frequent blackouts.

Should you install a whole-home battery backup system?

Installing a whole-home battery backup system means you won't need to break out the candles or worry about keeping the refrigerator closed during power outages. With independence from the utility grid, you can avoid the inconvenience of outages without sacrificing your daily routines.

Why do people install home battery storage systems?

"Energy independence is one of the biggest reasons people install home battery storage systems," says Gerbrand Ceder, professor at UC Berkeley and faculty staff scientist at Lawrence Berkeley National Laboratory. "It's seamless, so you don't even notice when power switches from the grid to your battery backup system."

Why do you need a whole-home battery backup system?

Whole-home battery backup keeps things business as usual during power outages. Why trust EnergySage? What are the best batteries for whole-home backup? Installing a whole-home battery backup system means you won't need to break out the candles or worry about keeping the refrigerator closed during power outages.

What is the best battery backup system?

The Tesla Powerwall 3 is the best whole-home battery backup system option. With a capacity of 13.5kWh, it offers plenty of energy storage to get you through power outages. The 10-year warranty also provides peace of mind that the product is built to last.
