

Why is the Bahamas struggling to diversify its energy mix?

One of the key challenges facing The Bahamas in its quest to diversify its energy mix is the high cost of electricity, which is primarily driven by the country's reliance on imported oil for power generation.

How can the Bahamas accelerate its energy transition?

By actively participating in these initiatives and learning from the experiences of its regional neighbors, The Bahamas can accelerate its own energy transition and reap the benefits of a cleaner, more affordable, and more secure energy future. SOURCE:

What type of energy is used in the Bahamas?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Bahamas: How much of the country's energy comes from nuclear power?

How much does electricity cost in the Bahamas?

In fact, The Bahamas has one of the highest electricity rates in the Caribbean, with an average cost of around \$0.36 per kilowatt-hour (kWh) in 2019. This is significantly higher than the regional average of \$0.25 per kWh and has placed a considerable burden on both households and businesses.

Is biomass a source of electricity in the Bahamas?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Bahamas: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does the Bahamas have a metering policy?

The Bahamas has made some progress in this area, with the introduction of a net metering policy for solar PV systems in 2017, but further policy reforms will be needed to accelerate the deployment of renewable energy.

**Energy Snapshot Bahamas** This profile provides a snapshot of the energy landscape of the Commonwealth of the Bahamas--a country consisting of more than 700 islands, cays, and islets-- of which only 28 are populated. Located north of Cuba, with the Turks and Caicos Islands to the southeast, the
