How much power does a draconic energy cube reactor make?

The reactor kicks on when I need a big boost of power to fill my Tier 4 Draconic Energy Cube. It makes about 28k RF/t with 13 fuel rods. Eventually,I'll expand to turbines on my reactor. I'm using solar panels from environmental tech but they can't quite keep up.

Is IIRC a good base for a Tier 7 draconic base?

Even then it was "just" 20k/rft iirc,which is great for a normal base,but sucks if you want to fill a tier 7 draconic energy storage. Solars only get to 2krf/t per cell and I didn't want to have a giant field of tier 6 solars. Lava gens are fine but require too much space for big rf generation,just like solars.

Draconic Energy Core Output Problem . Heya! So for a while I've been playing on the Enigmatica 2 modpack, and just recently I was able to get myself a self-sustaining fusion reactor (Mekanism) and a T7 Draconic Energy Core. I know that Draconic crystals can hold 64m RF each, 4x better than Wyvern's 16m RF. However, is that the only difference between them? Can they still transfer energy at the same rate? I'm asking because the purple aesthetic suits my base better, and I have enough storage, I just don't want to miss out if the energy can't flow fast enough.
