

What is the future of battery logistics?

The future is bright for those who keep up with it. It happens to be true in the case of battery logistics too. By 2030, the sales of electric vehicles are expected to cross 27 million units. This means that battery manufacturers like you ought to develop and deliver the most efficient solutions.

How can DHL help with EV battery logistics?

While the anticipated growth in EV battery logistics will be a challenge for many existing supply chains, DHL can help you tailor the right solution. As a close working partner of the technology sector, we've been testing, evaluation, and refining our battery logistics for years.

Where do you transport your batteries?

Usually carried out closer to the automotive assembly location, we help you transport your batteries to international assembly locations and aftermarket suppliers with ease. We ensure that your damaged and used batteries are taken to the recycling/refurbishment centres across Asia, Europe and the US with greater efficiency.
