

What are the different types of water storage solutions?

Water tanks such as well pressure tanks, reverse osmosis (RO) storage tanks, and thermal expansion tanks are among the most common water storage solutions for household water systems. These tanks are equipped with UV inhibitors that prevent sunlight from facilitating the growth of bacteria and algae in the tanks.

How do I choose a water storage tank?

When choosing a water storage tank, it's important to consider several factors. Most water storage tanks are made of food-grade polyethylene plastic resins with U.V. inhibitors. Ensure that the lining on the inside of the tank is white to make it easier to detect when the tank needs to be cleaned.

What is a water storage system?

Water storage systems are used to store drinking or potable water for consumption, as well as non-drinking water for irrigation and other industrial uses. These systems help streamline water delivery across the household, commercial, and industrial sectors including the agriculture, food & beverage, and manufacturing sectors.

What is a water storage tank used for?

Water storage tanks, as mentioned in the article '5 Best Plastic Water Storage Tanks - FF Cleaning Services', are used primarily for storing water. However, they can also be used to store strong chemicals such as petrochemicals, pharmaceuticals, and alcoholic beverages. To differentiate between tank sizes, you simply need to look at the number.

Who manufactures Polystar water storage tanks?

New Star Poly Products Ltd, based in Tema, Ghana, is the manufacturer of Polystar water storage tanks. They are a well-known and trusted company in the industry, offering tanks under the Polystar brand. Polystar tanks are available in a range of sizes, starting from 200 litres and going up to 25,000 litres.
