Chile's central bank said its interest rate can fall toward a neutral level given lower risks to inflation, according to the minutes of its most recent policy decision.

Chile's consumer prices rose less than expected last month, providing some good news to central bankers facing inflationary pressures from a weak peso amid an interest rate-cutting cycle.

Chile economists are betting a weaker peso and back-to-back inflation surprises will force the central bank to slow the pace of interest rate cuts next month.
