

Botswana economic development zone energy storage industry planning

How has the energy sector impacted Botswana's Economic Development Prospects?

Botswana has experienced some constraints in the energy sector in recent years, which to some extent have negatively impacted on the country's economic development prospects. A devastating power supply and demand mismatch was encountered between the years 2008 and 2014, and this breached the country's power supply security.

Does Botswana need a capacity building program?

In order to facilitate an effective development of the energy sector, the government of Botswana is obligated to build the necessary levels of human resource capacity across the board. Various actor groups have varying capacity needs hence capacity building programs should be tailored according to these various needs.

What is the energy policy in Botswana?

This Policy is calling for an increase in private sector development and the IEP will suggest various available options for financing of infrastructure projects and programs in the energy sector of Botswana. The Policy seeks to provide a conducive legal, fiscal and regulatory environment to attract investment into the energy sector.

Does Botswana have a guiding instrument for energy development?

A. Introduction Since 1985, Botswana's energy sector developments have been guided by the Botswana Energy Master Plan (BEMP), which was last reviewed in 2002. Since this last review, developments have progressed without any primary guiding instrument for almost 15 years now.

What is the main source of electricity in Botswana?

Coal is the main source of electricity generation in the country, followed by diesel. However, Botswana has ample renewable energy potential to augment generation from coal. Currently, solar energy contributes insignificantly to electricity generation despite the abundance of the resource.

What are the modes of transport of petroleum products in Botswana?

The adopted modes of transporting petroleum products are rail and road, which are not economic for the country. The industry is dominated by multinational oil companies and the prices for petrol, diesel and illuminating paraffin are controlled by the Botswana Energy Regulatory Authority (BERA). Energy Resource Availability

Our energy hub and industrial park is expected to contribute to Botswana's economy and support its Integrated Resource Plan objectives by: Facilitating the transition from coal and diversifying sources of electricity generation. Meeting Botswana's shortfall in electricity supply and contributing to decarbonisation.
