

Japanese conglomerate Panasonic has inked a deal with US start-up Sila to procure silicon for use in electric vehicle (EV) batteries. Panasonic is the largest battery manufacturer in North America and a supplier to major carmakers such as Tesla and Toyota. The move strengthens its position in the EV industry.

Bouvet Island is a Norwegian uninhabited protected nature reserve. As a subantarctic volcanic island, it is situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, making it the world's most remote island. It is not part of the southern region covered by the Antarctic Treaty System. The harsh climate and ice-bound terrain limits non-animal life to fungi ...

Our experienced team will guide you through the necessary preparations, ensuring you have everything you need for a successful and unforgettable expedition. Explore the Island Discover...

BOUVET ISLAND, a territory of NORWAY, is known as one of the peri-Antarctic islands, small uninhabited rocks and volcanic islands that circle the frozen continent. It was discovered by Jean-Baptiste Charles Bouvet de Lozier, a lieutenant in the French East Indies Company, on New Year's Day, 1739, but not found again until nearly a century later.

In 1971, Norway declared the island a protected nature reserve. Today, there is virtually no sign of human activity at Bouvet, with the exception of a single weather station located at Nyr&#248;ysa. This is the most common landing point on the island created by a rockslide in the 1950s. Wildlife of Bouvet Island

Bouvet Island is situated at the far southern end of the Mid-Atlantic Ridge and was officially designated a nature reserve over 40 years ago. The northwestern part of Bouvet Island, known as Ny&#248;ysa, is the only area where people can easily access the island. This region is mostly ice-free and hosts a weather station.

Bouvet Island is a volcanic island located in the South Atlantic Ocean. Its terrain is covered in ice and snow, giving it a pristine and untouched appearance. The island's active volcano, Olavtoppen, stands tall at a height of 1,950 meters above sea level, making it ...

This award makes SEC the first industrial battery company to be certified as ISO 9001-2015 compliant and we're thrilled to receive the recognition. "ISO 9001 is a standard that sets out the requirements for a quality management system. It helps businesses and organisations to be more efficient and improve customer satisfaction."

Japanese trading company Sumitomo is planning to expand its battery storage capacity in Japan to 500MW by March 2031, a significant increase from the current 9MW, Reuters has reported. The initiative is aimed at enhancing the stability and efficiency of the country's energy system amidst the growing integration of renewable energy sources.

Bouvet Island (/ ˈ b uː v eɪ / BOO-vay; Norwegian: Bouvet&#248;ya [3] [bʰv&#232;ːœʔ]) [4] is an uninhabited subantarctic volcanic island and dependency of Norway is a protected nature reserve, and situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, it is the world's most remote island. Located north of the Antarctic Circle, Bouvet Island is not ...

Bouvet Island's story begins in 1739, discovered by the French naval officer Jean-Baptiste Charles Bouvet de Lozier. However, due to inaccuracies in charting its coordinates, the island would become a phantom, missing from maps until it was rediscovered in 1808 by the British sailor James Lindsay. This small, uninhabited volcanic island ...
