

Where is Bouvet Island?

Bouvet Island (/ˈbuːveɪ /BOO-vay; Norwegian: Bouvetøya [bʊˈvʌːoe]) is an uninhabited subantarctic volcanic island and dependency of Norway. It is a protected nature reserve, and situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, it is the world's most remote island.

How did Bouvet Island become a dependency?

The expedition carried out aerial photography of the island and was the first Antarctic expedition to use aircraft. : 64 The Dependency Act, passed by the Parliament of Norway on 27 February 1930, established Bouvet Island as a Norwegian dependency, along with Peter I Island and Queen Maud Land.

When did Norway claim Bouvet Island?

In 1927, the first Norwegian expedition landed on the island, and claimed it for Norway. At that point, the island was given its current name of Bouvet Island ("Bouvetøya" in Norwegian). In 1930, following resolution of a dispute with the United Kingdom over claiming rights, it was declared a Norwegian dependency.

How did Bouvet Island get its name?

At that point, the island was given its current name of Bouvet Island ("Bouvetøya" in Norwegian). In 1930, following resolution of a dispute with the United Kingdom over claiming rights, it was declared a Norwegian dependency. In 1971, it was designated a nature reserve.

How far is Bouvet Island from Antarctica?

Bouvet Island is one of the most remote islands in the world. The closest land is Queen Maud Land of Antarctica, which is 1,700 km (1,100 mi) to the south, and Gough Island, 1,845 km (1,146 mi) to the north.

Are there humans on Bouvet Island?

In 1971, Norway declared the island a protected nature reserve. Today, there is virtually no sign of human activity at Bouvet, with the exception of a single weather station located at Nyreysa. This is the most common landing point on the island created by a rockslide in the 1950s. Penguins are the most apparent life on the island.

Salt and fresh water beaches, unsupervised, with washrooms and shorebird areas in the Kouchibouguac National Park. This is one of two excellent beaches within this spectacular national park. Callanders overlooks the warm water of the lagoons and is a great place for a leisurely swim and a picnic lunch. Of course there's more to do than just swimming!

Bouvet [2] of Bouveteiland (Noors: Bouvetøya) is een Antarctisch eiland, gelegen op 54° 26' ZB, 3° 24' OL, in de zuidelijke Atlantische Oceaan. Het eiland is een onbewoond afhankelijk gebied van Noorwegen en is het meest afgelegen eiland in de wereld. Het dichtstbijzijnde stuk land is de 1700 km

zuidelijker gelegen Prinses Astridkust, een deel van Koningin Maudland in Antarctica.

Indian telecommunications provider Bharti Airtel has teamed up with Secure Meters, a company that focuses on users of energy in homes and workplaces to help reduce energy waste, to deploy 1.3 million smart meters in Bihar, a state in eastern India. The smart meters will use NB-IoT services.

The initiative aims to modernise energy metering by utilising Airtel's advanced connectivity solutions including narrowband-IoT (NB-IoT), 4G and 2G technologies. These technologies can facilitate real-time data transfer and communication between smart meters and centralised applications.
