

The number of residential solar panel installations in Burkina Faso is not precisely documented. However, by the end of 2021, Burkina Faso had about 62 MW of installed solar capacity, with ongoing efforts to expand this further through various projects funded by international organizations like the World Bank.

Construction of a solar power plant of 33 MWc at Zagtoui was the first experience with diversifying the sources of electricity generation in Burkina Faso. The extension project will increase production by 22.5 MWc while improving the ...

Research shows that 47% of the population of Burkina Faso would optimally be served by clean hybrid mini-grids and stand-alone solar systems. Off-grid solutions therefore have a large potential in the country.

To achieve universal electricity access goals, the country needs new grid-connected power generation capacities, decentralized power systems and a reorganization of the sector. It is in this sense that the DtP initiative wishes to support Burkina Faso. However, several sectoral challenges, highlighted in the table below, hinder these efforts.

medisana is one of the leading specialists in the home health care market. For around 40 years, we have been committed to people's health under the motto „Your health in good hands“.

It outlines how Burkina Faso could reduce its reliance on fossil fuels and energy imports by taking advantage of its fast-growing solar power sector. The report found that by ...
