

Where are cactos batteries made?

Given a new lease on life, these batteries are then converted into 100kWh energy storage units at Cactos' factory in Muhos, Finland. While a battery is just a battery, the "other" side of Cactos' business involves a cloud computing service layered atop the energy storage unit that controls and optimises a growing fleet of power savers.

Are cactos batteries still useful?

When Cactos launched in 2021, second-life batteries were the most cost-effective component for BESS applications. But today, new lithium iron phosphate cells have become cheap enough to replace the old Teslas in most new storage units. Nonetheless, the elderly batteries still play a useful role.

How does a cactos power system work?

Conversely, Cactos units can also feed and provide stability to a power grid by balancing supply and demand. When there is a shortage of electricity, the units can automatically discharge energy into the grid, and if there is excess production, the units absorb energy.

Are Tesla Batteries A good replacement for a cactos battery?

For the Tesla batteries, however, the second job is not guaranteed forever. When Cactos launched in 2021, second-life batteries were the most cost-effective component for BESS applications. But today, new lithium iron phosphate cells have become cheap enough to replace the old Teslas in most new storage units.

Does cactos have a second-life battery?

With the new cash injection, Cactos plans to build a portfolio of over 1,000 storage systems. For the Tesla batteries, however, the second job is not guaranteed forever. When Cactos launched in 2021, second-life batteries were the most cost-effective component for BESS applications.

What is cactos & how does it work?

The concept is the brainchild of Cactos, a startup based in Finland. Cactos converts the batteries into smart electricity storage units, which optimise energy consumption. Investors are providing growing backing for the approach. Cactos today announced that it's raised over EUR26mn in equity funding, which the startup will use to build more units.
