

Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

How much solar power does Kazakhstan have?

In just five short years, solar power capacity has catapulted to 300 megawatts nationwide, and if you add other renewables like wind and hydropower, that number exceeds 700 megawatts, enough power to supply around 200,000 families in Kazakhstan. To understand just how remarkable this is, you have to know the context.

Is there a solar PV plant in Kazakhstan?

Both concentrated solar thermal and solar photovoltaic (PV) have potential. There is a 2 MW solar PV plant near Almaty and six solar PV plants are currently under construction in the Zhambyl province of southern Kazakhstan with a combined capacity of 300 MW.

Does Kazakhstan have a potential for wind and concentrated solar power?

"Kazakhstan's potential for wind and concentrated solar power", Almaty, Kazakhstan. ^ "Energika Kazaxstana" (PDF). Obzor perspektiv. Retrieved 5 May 2016. ^ "RES in Kazakhstan: More than 1 GW until 2020", KazCham.com. Retrieved 5 May 2016. ^ "EBRD finances 50 MW solar park in Kazakhstan", 13 June 2017.

Can solar power drive Kazakhstan's Energy Transition?

However, Kazakhstan's solar ambitions do not fully tap into its potential, and the technology could play a far larger role in the country's energy transition due to its low cost and flexibility. The focus now is on leveraging solar's comparative advantages to drive forward Kazakhstan's decarbonisation and harness its significant solar resources.

Which EBRD financed two solar parks in Kazakhstan?

The European Bank for Reconstruction and Development (EBRD) financed two solar parks in Kazakhstan. The first one, 50 MW Burnoye Solar 1, was established in April 2014. The second one, known as Burnoye Solar 2, is also 50 MW and will be located in the Zhambyl region.

OverviewCurrent statusHydro renewable energySolar energyWind energyBioenergyBarriers to renewable energyRenewable energy projectsThere is enormous potential for renewable energy in Kazakhstan, particularly from wind and small hydropower plants. The Republic of Kazakhstan has the potential to generate 10 times as much power as it currently needs from wind energy alone. But renewable energy accounts for just 0.6 percent of all power installations. Of that, 95 percent comes from small hydropower projects. The main barriers to investment in renewable energy are relatively high financing costs and an abse...
