

# Construction of new energy storage industry project in Sudan

Will Sudan's First Solar Park be built in the UAE?

According to the country's Ministry of Energy, an unspecified UAE solar company has committed to building several large scale PV plants across the country. These new projects would be granted a 20-year PPA and would be Sudan's first solar parks. Few specifics were outlined in the statement.

What are the energy production resources in Sudan?

More than 96% of this capacity was derived from fossil fuels and hydropower; the rest was dependent on RE, viz., solar and biomass. The country started to increase its production from solar resources, leading to an increase in capacity from 14 MW in 2019 to 18 MW in 2020. Shows the breakdown of energy production resources in Sudan.

How can Sudan restructure its energy sector from Morocco?

One of the most useful strategies Sudan can adopt from Morocco is the use of new legislation and new policies to restructure the energy sector. This recommended adjustment could encourage future investments targeting renewable production and attract more foreign and local investors to participate in renewable production projects.

How much solar power does Sudan have?

Most of Sudan's electricity generation comes from around 3.2 GW of hydropower. According to the latest statistics from the International Renewable Energy Agency, Sudan had only 19 MW of installed solar power at the end of 2019. The Sudanese government is aiming to install 500 MW of solar and 300 MW of wind by the end of the year.

How can Sudan achieve energy self-sufficiency?

Encouraging solar and wind power in the country's energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

Can Sudan maximize its energy resources?

The analysis reveals promising indicators of Sudan's ability to maximize its solar, wind, and geothermal energy resources. It also presents conclusions and recommendations concerning the future of RE policies and production in Sudan.

The wind project is designed to show how viable utility-scale wind power is for Sudan. The installation is part of the local government's efforts to boost investment in renewable energy by taking advantage of the country's ...
