

Will AMEA power build a solar photovoltaic plant in Djibouti?

Emirati independent power producer (IPP) AMEA Power has signed agreements to build a solar photovoltaic plant in Djibouti. With a capacity of 30 MWp, the construction of the solar plant will be done in the framework of a public-private partnership (PPP).

What is a power purchase agreement (PPA) in Djibouti?

Amea Power has secured a power purchase agreement (PPA) for a 25 MW solar-plus-storage project in Djibouti. It will be the country's first independent power producer (IPP) project and is now in development under a build-own-operate and transfer (BOOT) framework.

Will AMEA Power Invest in Djibouti's first IPP project?

The solar plant is the country's first IPP project and will be developed under a BOOT model. "The Sovereign Fund of Djibouti (FSD) will be joining the project before financial close as a minority shareholder," AMEA Power said, without providing additional details.

Why is Djibouti relying on IPPs?

According to Power Africa, Djibouti has an installed capacity of only 126 MW. Out of this just 57 MW are reliably available to serve a population of nearly 988,000 and its main industries. However, the government is relying on IPPs to exploit Djibouti's renewable energy potential. The government is ramping up its renewable energy capacity.

Where does Djibouti's energy come from?

Most of Djibouti's energy supply, around 80%, is sourced from neighboring Ethiopia. At the end of 2023, Djibouti was among the select few countries throughout the world that had yet to install any PV capacity, according to the International Renewable Energy Agency (IRENA).

On average, African countries can receive strong sunshine in 325 days per year with a covering rate of 60,000,000/hour per day per square meter. Theoretical reserves of solar energies account for near...

Bluesun Solar Co., Ltd was founded in 2013, is one of the solar power solution leading companies in China, with an office area of 3000 square meters and a peripheral warehouse area of 2000 square meters, focuses on the research ...

Huawei offers leading Smart PV solutions harnessing more than 30 years of expertise in digital information technology. By integrating AI and Cloud, Huawei further incorporates many latest ICT technologies with PV for optimal power generation, thus making the solar power plant to be Highly Efficient, Safe & Reliable with Smart O& M and Grid Supporting capabilities and builds the ...

Extreme heat, droughts, and floods are serious threats to the livelihoods and economic growth of Djibouti. If

action isn't taken quickly, the country could lose up to 6% of its GDP each year by 2050, which is equivalent to nearly four years of current economic output, according to the World Bank's first Djibouti Country Climate and Development Report (CCDR).

Gabriel is a Planner with over 2 years of experience working on the delivery of Nationally Significant Infrastructure Projects (NSIPs) relating to energy and infrastructure. He holds both onshore and offshore experience across solar, battery, wind and interconnector projects.
