

Does Denmark have CO₂ storage in the North Sea?

The Danish Energy Agency received two applications in the first round of licenses for CO₂ storage in the Danish North Sea. The two applications came from TotalEnergies EP Danmark A/S and a consortium consisting of INEOS E&P and Wintershall Dea International.

What are Denmark's CO₂ storage licenses?

The licenses are an important step towards realizing Denmark's CCS (Carbon Capture and Storage) strategy and will kick start the plan for the development of full-scale CO₂ storage in Denmark. The Danish Energy Agency received two applications in the first round of licenses for CO₂ storage in the Danish North Sea.

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore "energy atoll" (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

Can Denmark be a commercial hub for CO₂ storage?

The Geological Survey of Denmark and Greenland (GEUS) has previously demonstrated that the Danish subsurface is particularly suitable for CO₂ storage, both offshore and onshore, thus enabling the opportunity for Denmark to serve as a commercial hub for CO₂ storage from all of Europe. What does the permit entail?

How much CO₂ can the Danish subsurface store?

GEUS has estimated that the Danish subsurface theoretically can store up to 22 billion tons (GT) of CO₂. This is equivalent to between 500 and 1000 years of total Danish emissions at current levels. Contact Head of Division, Henrik Sulsborg, tlf: 33 92 66 86, hesu@ens.dk

When are the new energy licenses issued in Denmark?

Awarding of the new licenses takes place after the Minister of Climate, Energy and Utilities has presented a report to the Climate, Energy and Utilities Committee of the Danish Parliament explaining which licenses the minister intends to issue.

Resundskraft Kraft & Varme AB and INEOS on behalf of Project Greensand have signed an agreement to investigate the opportunity to store up to 210,000 tonnes of CO₂ annually from Sweden in Denmark. The captured ...

The "Køge Kalundborg CO₂ Hub", which was awarded a 20-year contract by the Danish Energy Agency in May 2023, will capture 430,000 tonnes of biogenic CO₂ annually from the two combined heat and power plants. The ...

The Danish Energy Agency is publishing the final tendering materials for the CCS Fund. CCS stands for

Carbon Capture and Storage. The CCS Fund has a total budget of DKK 28.7 billion including VAT (in 2025 prices), which will cover the costs of capture, transportation and geological storage of fossil, biogenic or atmospheric CO₂ over a 15-year contract period.

Houston/Paris, September 30th 2024 - TotalEnergies has started commercial operations of Danish Fields and Cottonwood, two utility-scale solar farms with integrated battery storage located in southeast Texas. These new projects, ...

Danish renewables company European Energy A/S has begun construction of its first large-scale battery energy storage system (BESS) project in Denmark, seeking to install ...

and storage of energy 7 Using ICTs to enable intelligent energy management and control 9 Empowering the consumer 10 4. Overview of the Danish smart energy sector 11 Turnover and employment 11 A new agenda for Denmark's energy policy 12 Export 14 Innovation activities and barriers 14 5. Danish competencies across the value chain 16

2 STORAGE PROJECTS PUBLICLY ANNOUNCED BY COMPANIES - EARLY STAGE PROJECTS

Figure: Picture from Gas Storage Denmark's gas storage operation in Stenlille. ... o The Danish Energy Agency awards the contract to Ørsted's full scale CCS project (English) o Tender material for CCUS Fund & NECCS Fund (English)

Denmark's government has awarded \$24 million of financial support annually between 2026 and 2032 to three companies for carbon capture and storage projects that aim to handle 160,350 tonnes per ...

A concise overview of the legal framework governing renewable energy projects in Denmark, including key legislation, government incentives and dispute resolution. ... supply and storage of natural ...

In this project, Ea Energy Analyses was in charge of updating and adjusting the guidelines of the Danish technology catalogue "Technology Data for Energy Storage" and creating a specific chapter regarding Electrical Energy Storage. The task included a review and alignment of the technology chapters and related data sheets.

By the middle of 2025, the battery parks will be able to store 36 MW / 72 MWh of electricity at any time - the equivalent energy of powering 6,000 Danish households. BattMan has also begun development on a fourth battery ...

If successful Danish industry related to renewable energy resources will benefit, including hardware manufacturers, power system service providers, energy consultants and so-called green technology actors. The objectives of Bornholm Smart Grid Secured (BOSS) are to develop and demonstrate an advanced Danish BESS solution. Using existing strong ...

Today, the Danish Energy Agency opened for companies to apply for a licence to explore the subsurface for CO₂ storage in certain coastal areas in Denmark. At the same time, the Danish Energy Agency invites potential applicants to ...

The Danish Ministry of Climate, Energy and Utilities has revealed that it will provide DKK 128 million (\$19 million) to build two large-scale, renewables-powered energy storage projects.

Support for R& D and Innovation. Since 2007, Denmark's Energy Technology Development and Demonstration Programme (EUDP) has provided funding for the demonstration of innovative green technologies, including those focused on geological CO₂ storage and direct air capture (DAC) technology. Projects include Bifrost and Greensand, both focused on ...

TotalEnergies has started commissioned two Texas solar projects with a combined capacity of 1.2GW and battery energy storage systems (BESS). ... The projects are the 720MW Danish Fields project ...

COPENHAGEN, Denmark, April 11, 2025 /PRNewswire/ -- Norne Thorning Storage ApS (Norne), a Fidelis New Energy, LLC company, has been awarded the Tuesday, 02 ...

European Energy breaks ground on battery storage in Denmark together with Kragerup Estate. Project to provide operational experience for European Energy in integration of battery solutions. Copenhagen, Denmark, ...

The list of projects below illustrates the types of projects we are working on. ... the Danish Energy Agency, the Embassy of Denmark in Hanoi, EREA (Electricity and Renewable Energy Authority, Vietnam), Institute of Energy in Vietnam, and Ea Energy.. ... In Høje Taastrup the establishment of a pit thermal energy storage is planned, which has ...

The company focuses on developing, financing and investing in wind and solar farms and large-scale green energy storage projects. European Energy mainly serves customers ...

In collaboration with a consortium of partners from Denmark and Europe, Hyme will build the first molten hydroxide energy storage plant in the world. This plant, located in Semco Maritime's facilities in Esbjerg, will be able to test and prove: ...

Today, the Danish Energy Agency opened for companies to apply for a licence to explore the subsurface for CO₂ storage in certain coastal areas in Denmark. At the same time, the Danish Energy Agency invites potential applicants to an ...

The limited potential of storage highlighted in previous Danish demonstration projects is a result of design choices and particularly of small volume-to-power ratios for batteries. ... This Chapter introduces the types of energy storage considered in this study: Li-Ion batteries, flywheels and high-temperature thermal energy

storage (HT-

Denmark offers great conditions for CO₂ capture, storage and utilisation, and experience within the full CCUS value chain from efficient combined heat and power plants (CHP) to waste-to-energy facilities, energy ...

The fund for negative CO₂ emissions (NECCS fund) has been completed, and the Danish Energy Agency has awarded contracts to three companies for new CCS projects. Together, the ...

INEOS, through the Project Greensand consortium with partners Harbour Energy and Nordsøfonden, is leading the development of one of Europe's most advanced CO₂ storage sites. The latest development will play a ...

Energy storage with minimal heat loss. In cooperation with several Danish universities, the geothermal operating company, GEOOP, has contributed to different research projects within geothermal energy. According to Lars ...

Denmark has been an early leader in decarbonisation and is inspiring many countries around the world. The technological transformation of Denmark's energy system is fast and visible, notably in electricity with offshore ...

Great potential for CO₂ storage in Denmark. The Danish subsurface contains several areas with good conditions for storing CO₂. Five onshore areas have been identified ...

Denmark's first offshore CO₂ storage site certified Why Esbjerg is Denmark's energy transition metropolis. Martin Christensen, Gas Storage Denmark's CEO, commented that in a future green energy system, where a ...

GEUS, Gas Storage Denmark Advanced Development 2025 0.5 Expansion is not possible Onshore - Saline Aquifer (Stenlille) 4 Norne Storage Not applicable Norne is a CO₂ storage project which has been announced by the Danish Energy Agency (DEA). No further details about the project are publicly available. no data no data no data no data no data no data

The Green Hydrogen Hub, a collaboration between Corre Energy, Eurowind Energy and Danish state-owned Energinet, aims to establish one of the world's largest green hydrogen production plants and combine it with an ...
