

Who is thornova solar?

Thornova Solar is a young US-based newcomer making waves in the solar industry. Let's take a closer look at this intriguing new player and see if Thornova Solar panels deserve a spot on your rooftop. Get ready - here comes our Thornova Solar panel review! Thornova Solar is a young solar company founded in Fremont, California, at the end of 2022.

Is thornova / Sunova solar a Tier 1 module manufacturer?

In its 4th quarter 2024 report, Bloomberg New Energy Finance (BNEF) continues to list Thornova /Sunova Solar as a Tier 1 module manufacturer. Thornova Solar and Upsolar announce a significant partnership, committed to providing customized solar solutions for the Balkan region, including...Sunova Solar becomes Thornova Solar!

How powerful are thornova solar panels?

Impressive power and efficiency: Thornova panels boast high wattages, ranging from 400 to 720 watts. Efficiencies sit around between 20.5% and 23.2%. This translates to generating more electricity per panel, requiring fewer panels to build a truly powerful system.

What happened to thornova solar?

With this in mind, we have decided to move past the Sunova Solar brand and continue our future as Thornova Solar. Our latest high-density PV panels stand for exceptional electricity production and are used in applications ranging from floating solar systems to lowlands and alpine altitudes.

Where are thornova solar panels made?

While having manufacturing capacities in Vietnam, Thornova strategically focuses on the North America markets. Their power output ranges from 400W to 720W, while their efficiency generally floats from 20.5% to 23.2%. Thornova solar panels are backed up with a 15-25-year product and 25-30-year performance warranty.

How much do thornova solar panels cost?

The performance is guaranteed at 84.8% - 87.4% of the panel's original power output after 25 - 30 years of operation. Pricing details of Thornova solar panels are not easy to source on the market. Yet manufacturing in Asia is much cheaper than in the US, so we expect panels to average between \$0.6 and \$0.8 per watt.

The Thornova Solar module showed extremely low deviation of on average only 0.24% on the LETID stress tests that take place at 75°C and take 486 hours at Kiwa PVEL but only 162 hours for IEC 61215-2016 module certification. LETID is a phenomenon closely related to PERC cells and occurs when cells reach temperatures over 40°C during operation.
