

Why should Egypt invest in solar energy?

It provides fresh momentum to the local economy and acts as a key driver in supporting Egypt's 2030 renewable energy goal of achieving 42% clean energy transformation. "This project not only strengthens Egypt's solar industry but also positions the country as a key solar manufacturing hub in the Middle East and North Africa (MENA).

Will Elite solar build a solar manufacturing hub in Egypt?

EliTe Solar, a global manufacturer of PV cells and modules, has unveiled plans for a solar manufacturing hub in Egypt. The company announced the investment venture, worth over \$150 million, following discussions with Egypt's Prime Minister, the Chairman of the Suez Special Economic Zone, and the Chairman of Chinese conglomerate TEDA.

What does China's new solar project mean for Egypt?

A new agreement signed between the Chinese group and Egyptian government officials is part of the country's Green Corridor Initiative that aims to increase the use of renewable energy. The solar project is expected to save more than \$1 billion in annual natural gas costs.

Does Egypt need a diversified energy architecture?

Considering the recent power shortages and blackouts experienced across Egypt this year, which highlight strong future demands for electricity, there is an urgent need for a diversified energy architecture to ensure energy independence.

Why should Egypt move towards a sustainable environment?

We believe that Egypt should move towards a sustainable environment to realize its full potential and move towards energy independence. We are Egypt's Leading IPP (Independent Power Producer) certified company that finances, designs, installs and commissions Photovoltaic solar power plants.

Will Elsewedy Electric help Saudi Arabia reach net-zero emissions by 2050?

Elsewedy Electric, a leader in integrated infrastructure solutions, has announced its partnership with Al-Ghazala Energy Company, the KSA-based subsidiary of Jinko Power Technology Co., Ltd. to assist Saudi Arabia in reaching net-zero emissions by 2050.
