

What is Meditterra Energy Corporation doing in Egypt?

Meditterra Energy Corporation has also been provided with the support of the Ministry of Petroleum and Mineral Resources, in addition to its relevant bodies to boost the capital program of assets in the Sinai including Sudr, Asl, and Matarma Oil Fields ("SMA"). This support has also contributed to new oil pool discoveries in Upper Egypt (Komombo).

Will Egypt be able to harness renewables for hydrogen production?

The move follows Egypt's Petroleum Minister, Tarek El Molla, saying the country planned for renewables to make up 60% of its energy mix by 2030. Its location in the global "sun belt" means it averages 9-11 hours of sunshine a day, with few cloudy days, giving it high potential for harnessing renewables for hydrogen production.

Who is Meditterra energy?

Established in Calgary in 2012, Meditterra Energy Corporation is a Canadian energy firm working in the international upstream oil and gas industry, specifically focused on the exploration and development potential in the Middle East and Africa.

How does Egypt deal with the energy crisis?

To alleviate the crisis, Egypt has allocated \$1.2bn to fund initial energy imports, including 21 LNG cargoes that have begun to arrive, mainly from the US. The blackouts, which began in April, ended at the beginning of August but could resume in mid-September, according to the government.

Why did Meditterra invest in Egypt?

With Egypt moving towards being a regional energy hub, Meditterra was quick to move in on the action by creating a diverse asset portfolio within the country.

Is biomass a source of electricity in Egypt?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Egypt: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
