

Who is vispiron energy?

VISPIRON ENERGY has been active in the photovoltaic sector since 2007. Regionally and internationally, we have realised more than 250 MWp of solar plants. We are one of the largest German private operators of solar plants. We design solar combined power plants consisting of photovoltaic system, battery storage and charging stations.

What is the energy supply in El Salvador?

In 2019, total energy supply in El Salvador reached around 156 600 TJ (see Figure 5). That year, the renewable energy source with the largest share as part of the primary energy supply was bioenergy (19.6%), followed by hydropower (3.5%), geothermal energy (3.4%), and solar energy (1.1%) (CNE, 2020).

How much electricity is produced in El Salvador?

The institution currently has a total installed capacity of 204.4 MW and a net production equivalent to 21.8% of the electrical energy produced in El Salvador. CECSA, a CEL subsidiary, is a company dedicated to the generation of electrical energy through small hydropower plants.

How does EDP work in El Salvador?

By shifting a significant amount of power supply to natural gas, EDP reduces El Salvador's reliance on diesel and heavy fuel oil-fired power generation, offsetting 600,000 tons of carbon dioxide emissions per year, and provides grid support to facilitate more renewable energy penetration, further diversifying the country's energy mix.

How much thermal capacity does El Salvador have?

In the last five years, the average annual growth rate of total installed capacity has been around 6%. Since 2013, however, there have been no new additions of conventional thermal capacity (which in El Salvador has traditionally corresponded to fuel oil and bunker fuel).

How much bioenergy does El Salvador produce a year?

The estimated net primary production of bioenergy in El Salvador is around 10.5 tonnes of carbon per hectare per year (tC/ha/yr), which is well above the global average of between 3 tC/ha/yr and 4 tC/ha/yr (IRENA, 2019). In 2018, bioenergy (sugarcane bagasse and firewood) stood at over 18% of primary energy supply.

VISPIRON ENERGY ist seit 2007 in der Solar-Branche tätig und hat national wie international mehr als 200 MWp Solaranlagen realisiert. Neben der Systemintegration von Solarkraftwerken, Batteriespeicherkraftwerken und ...

El Salvador's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and

operated by the public company CEL (Comisi n Hidroel ctrica del R o Lempa), the rest of the generation capacity is in private hands. With demand expected to grow at a rate ...
