

What is Moldova's energy policy?

Moldova's energy policy focuses on improving integration in regional markets, strengthening energy security, improving compliance with EU directives, increasing electricity generation capacity and promoting energy efficiency and renewable energy.

What is Moldova's energy self-sufficiency?

Moldova's energy self-sufficiency is among the lowest in the world: only around 25% of its energy demand is covered by domestic production, consisting almost entirely of solid biomass and variable renewable energy sources.

Does Moldova have a good energy sector?

Moldova is also on the right path to developing a sound institutional structure in the energy sector, informed by better statistical data. The National Bureau of Statistics (NBS) is commended for its efforts to improve energy data collection and reporting.

How does Moldova share energy data?

Moldova shares energy data through five annual International Energy Agency (IEA)/Eurostat/UN Economic Commission for Europe (UNECE) joint questionnaires.

What is Moldova's energy consumption?

Transport sector is the second-largest energy consumer (around 0.7 Mtoe) and the main driver in oil consumption growth. Renewables represent 20% of Moldova's energy mix, consisting almost fully of solid biofuels (19% in 2018). 6% of electricity generation comes from renewable sources (hydro, wind, solar PV).

How much energy does Moldova use?

Moldova consumes around 4 million tonnes of oil equivalent (Mtoe) of energy per year (4.1 Mtoe in 2018), comparable to energy consumption in Luxembourg. Moldova's energy self-sufficiency is very low, among the lowest in the world.

Acest portal a fost realizat în cadrul Proiectului "Consolidarea democrației în Moldova prin alegeri incluzive și transparente" implementat de PNUD Moldova cu suportul financiar al Agenției Statelor Unite pentru Dezvoltare Internațională (USAID), Ambasadei Marii Britanii la Chișinău prin intermediul Fondului pentru Buna Guvernare și al Ambasadei Olandei prin Programul Matra.
