

What is a modular electrical enclosure?

Modular electrical enclosures are new cabinets made of decarbonized steel, enabling the formation of large electrical panels. They are used for industrial automation and control, electrical power distribution, and electronic applications. Replacing Spacial SF, these steel floor-standing enclosures are a type of modular electrical enclosure.

Why is a universal enclosure necessary?

A universal enclosure is necessary because it protects the inside installed equipment against the external environment and protects people against accidental contact with internal electrical equipment. The correct selection of an electrical enclosure and thermal management is crucial to ensure the targeted performance.

What is a steel-made wall-mounting enclosure?

Steel-made wall-mounting enclosures are industrial boxes made of steel that can be coupled by all their side surfaces, offering the broadest range of available dimensions on the market. They are Class II insulating enclosures.

How to choose the right electrical enclosure & thermal management?

Choosing the right electrical enclosure and thermal management is crucial to guarantee the targeted performance. Enclosures prepared to your own specifications can save wiring operators' time from enclosure preparation tasks. Secure quality with execution by powerful industrial equipment.
