

What percentage of Tunisia's electricity is renewable?

In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy. While STEG continues to resist private investment in the sector, Parliament's 2015 energy law encourages IPPs in renewable energy technologies.

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

Does Tunisia have a green wave of energy production?

This creates the overlap for biogas to take on some level of energy production in Tunisia's continued green wave of energy production. In 2016, Tunisia emitted 29 Mega tons of carbon dioxide equivalent (MtCO₂e) in greenhouse gasses. The country aims to reduce its carbon intensity by 13% in 2030, compared to 2010 levels.

Does Tunisia have a solar power plant?

First utility-scale photovoltaic plant (10 MW, in Tozeur) was commissioned in 2019 on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

Should Tunisia establish an Energy Regulatory Authority?

Tunisia should also prioritize establishing an energy regulatory authority to help enforce performance standards and strengthen the financial viability of the sector and address the governance challenges, political instability, and insufficient government commitments that are impeding private sector engagement. (Learn more about climate finance .)

Who produces electricity in Tunisia?

State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity. The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company (CPC), a 471-MW combined-cycle power plant.

Headquartered in The Hague, Mazarine Energy was founded by Edward van Kersbergen in 2013. Later that year, the company's Tunisian subsidiary obtained operatorship of a permit in central Tunisia. Within 18 months, it had acquired 3D seismic data and drilled two wells, both of which discovered hydrocarbons and were successfully tested at commercial

20:04, TUNIS/Tunisia Tunis, July 29 (TAP) - Six memorandums of understanding for green hydrogen

production in Tunisia were signed on July 29, 2024 in Tunis, in the presence of Industry, Mines and Energy Minister Fatma Thabet Chiboub. The agreements were signed by Tunisia and several foreign companies, according to a press release issued by the Industry ...

Aksa Energy, a global energy company with the power plant investments in 7 countries, took its first step towards globalization in 2015. Transferring its efficiency and sustainability oriented approach to overseas markets, Aksa Energy firstly entered Africa with power plants in Ghana, Madagascar and Mali which were built and commissioned in a very short period.

Saphon Energy is a Tunisia-based cleantech company specialized in developing and promoting a breakthrough innovation named "The Saphonian", Zero-Blade wind converter. The Saphonian, invented by ...

USAID Power Tunisia. Advancing Tunisia's energy security and resilience by providing technical assistance and facilitating investment funding for the deployment of clean energy technologies resulting in increased clean energy generation capacity, reduced energy demand and consumption, and lower CO2 emissions.

The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production. Through the TERI UMBRELLA, the World Bank has ...

Tunisia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas ...

OverviewElectrical sector and renewable energiesOil and gas upstream sectorDownstream sectorNuclearSee alsoThe International Energy Agency reports for 2014 an electricity production of 19 TWh, compared to 10.5 TWh in the year 2000. The Tunisian Company of Electricity and Gas (STEG), a public company, ensures the three quarters of production. The network operates at 50 Hertz and the voltage at the domestic level is 230 Volts. Virtually all Tunisian electricity (18 TWh) is produced by thermal power plants burning natural gas...

French utility Engie and Moroccan energy company Nareva have partnered to build a photovoltaic power plant in the Gafsa governorate, 350km south of Tunisia's capital, Tunis.. The two-company consortium was contracted after it won an international tender launched by the Tunisian energy ministry and Societe Tunisienne de l'Electricite et du Gaz (STEG), the ...

The Government released an update to the Tunisia Solar Plan in 2018-- an ambitious roadmap for their energy sector--which calls for the acceleration of renewable energy projects by 2030. By then, Tunisia hopes to ...
