1. Prioritize customer centricity as the energy transition reshapes commodities. The energy transition is redefining the commodity asset class with the arrival of new offerings being differentiated by geography, production methods, regulatory treatment, and environmental impact--and therefore being valued differently by customers.

Globally, demands for cleaner sources of energy are on the rise. Apart from oft-traded commodities like electricity, crude oil, and natural gas, the energy trading market is witnessing a surge in wind, solar, hydroelectric, and other low-carbon energy trading. In turn, the global energy trading market is picking up pace.
