

How is the World Bank helping the Maldives achieve net-zero?

The World Bank has been helping the Maldives transition to clean energy and achieve its 2030 net-zero target. The recent signing of an 11-megawatt solar project will see private energy investments deployed in six population centers across the archipelago.

How will aspire and rise help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.

Why is electricity so expensive in the Maldives?

Reliance on imported diesel for power generation, the lack of economies of scale, and poor quality of infrastructure have resulted in a high cost of electricity in the Maldives. Maldives has a target to reach net-zero emissions by the year 2030 with international support.

Will Maldives reach net-zero emissions by 2030?

Maldives has a target to reach net-zero emissions by the year 2030 with international support. World Bank has been contributing to a clean energy transition in the Maldives. The Maldives has always been the Land of Sun, Sea and Sand. Each year, more than a million tourists explore the sunny beaches and blue ocean.

Can aspire help reduce fossil fuel subsidies in the Maldives?

“ASPIRE showcases that there is an opportunity to reduce fossil fuel subsidies, reduce the fiscal deficit burden on the government, and present a clear business case for renewable energy projects in the Maldives,” said Simon Stolp, Practice Manager for Energy in South Asia at the World Bank.

Is Maldives a sustainable country?

Maldives -- The Land of Sun, Sea and Sand -- will, over the next few years, go from being a tourist paradise to a small island nation that is leading the way in showcasing energy sustainability to the world.

These scammers may pretend to be your energy company, say they're from Ofgem or even from Energy Saving Trust to try and gain your trust. They can use the availability of grants, promises of cheaper energy or to make your home more energy efficient, as tactics to trick you. Scammers can contact you in many ways: by a knock at your door.
