

Intersect Power's proposed Darden facility will consist of an up to 1,150MW behind-the-meter solar farm and 4.6GWh BESS hooked up to a 1,150MW green hydrogen generation facility in Fresno County, California. As reported in Energy-Storage.News, Intersect Power recently brought online its Oberon Solar and Storage project (pictured above) which ...

NextEra is one of the largest clean energy operators in the US, and owns this BESS, the Desert Sunlight Battery Energy Storage System project. Image: NextEra Energy Resources. Independent power producer (IPP) NextEra Energy Resources (NEER) is set to build a 600MW standalone BESS facility in the City of Ontario, California, half of which is ...

Norway-based IPP Scatec has won preferred bidder status for a 103MW/412MWh battery energy storage system (BESS) project in South Africa, part of a 513MW tender. EDF Renewables reaches financial close on hybrid wind, solar and storage project in South Africa ... Clearway signs offtake exclusivity agreement with California utility for 3GWh ...

The projects are located in the greater Los Angeles area. Image: Slices of Light/Flickr. New Goldman Sachs-backed developer GridStor has acquired a portfolio of in-development battery storage projects in LA, California, from Upstream Energy, totalling 500MW/2,000MWh.

As with last year, California and Texas will see the most battery storage installations among US states. As of November 2023, California had 7,302MW of utility-scale BESS, and Texas 3,167MW. All other US state's installed capacity by the end of last year added up to 3.5GW, less than half California's capacity.

Battery storage has a big role to play in helping reduce renewable energy curtailment in California but the amount of shedded load will still grow in 2023, an analyst told Energy-Storage.news.. Grid operator CAISO recently revealed that a total of 2.4TWh of wind and solar production was curtailed over the course of 2022, of which roughly two-thirds occurs in ...

German power generation company RWE has announced that it has linked its 137MW utility-scale battery energy storage system (BESS), called Fifth Standard, to the California independent system operator. Located in ...

California now has more than 10GW of battery storage, with Governor Gavin Newsom hailing the state's "energy storage revolution," which is underway. Cumulative installations have now reached 10,379MW in the state, ...

Once completed, the combined project will provide 758 MW of solar capacity and 300 MW/1,200 MWh of

energy storage in Southern California, with a total investment of ...

The world's newest country, South Sudan, is also the least electrified. A period of growth that began after a 2005 peace deal and continued after independence in 2011, saw billions of dollars in oil revenue and strong ...

Convergent Energy + Power has celebrated the successful commissioning and start of commercial operations at two battery energy storage system (BESS) projects with a combined capacity of 60MWh in California, US. The energy storage developer said yesterday that the two storage systems it financed and developed in California's Orange County are ...

The California ISO's (CAISO) Resource Adequacy programme, through which utilities secure capacity from generating units, only requires a four-hour duration for energy storage. Energy-Storage.news has asked CPA for more details and will update this article in ...

In April 2016, representatives from IDC and other South African entities participated in a USTDA-hosted reverse trade mission (RTM) to the United States. The RTM introduced the delegates to state-of-the-art U.S. technologies, equipment and services - as well as policies, regulations and financing mechanisms - that can support the implementation of energy storage projects in ...

As of the end of 31 July there was 6,617MW of BESS in the state, the California Energy Commission (CEC) said, a figure which has doubled in two years. ... "Energy storage systems are a great example of how we can harness emerging technology to help create the equitable, reliable and affordable energy grid of the future," said CEC Vice Chair ...

The CIS promotes new investments in renewable energy dispatchable capacity, such as battery storage, solar, and wind power generation. This will enable Australia to meet the increasing electricity demand and bridge reliability gaps as old coal power stations phase out of the grid, something that is expected to be achieved on the National Electricity Market (NEM) by ...

Recent developments reported by Energy-Storage.news include a 2.1GWh, three-project portfolio of BESS that will be owned by utility Southern California Edison and a 226MWh build-out of vanadium flow battery ...

The bill comes into force with California's rapid deployment of battery energy storage system (BESS) assets continues. BESS resources help balance the grid, integrate growing shares of renewable energy, maintain electricity supply reliability in the face of load growth, wildfires and other causes of outages and enable thermal generation retirements.

Gridstor starts commercial operations at 60MW/160MWh California battery storage facility. By JP Casey. December 6, 2023. Americas, US & Canada. Grid Scale. Technology, Business, Materials ... has verified with Energy-Storage.news that it voted unanimously 3 December, to certify utility Georgia Power's plans to build 500MW of battery ...

Recent developments reported by Energy-Storage.news include a 2.1GWh, three-project portfolio of BESS that will be owned by utility Southern California Edison and a 226MWh build-out of vanadium flow battery storage at solar PV sites by community energy supplier Central Coast Community Energy.

The government of California has approved a US\$42 million grant to Pennsylvania-based IPP International Electric Power (IEP) for a long-duration energy storage project at Marine Corps Base Camp Pendleton, in San ...

The pair's Potentia-Viridi battery energy storage system (BESS) project is in development through a 50:50 joint venture (JV) that the two independent power producers (IPPs) formed back in 2022. ... The developers are currently seeking permission from the California Energy Commission (CEC) to construct Potentia-Viridi. ...

Germany utility company RWE has brought its biggest utility-scale battery energy storage system (BESS) project in the US closer to the start of commercial operations. ... subsidiary submitted permitting applications for the solar and storage facility in California's Fresno County 2018. At that stage, EC& R Solar Development was seeking to ...

options for delivering efficient and sustainable energy in South Sudan for both short and long terms. 2. An overview of the energy situation 2.1. Oil dependence South Sudan owns the third largest oil reserves in Africa, valued at about 472 million Metric Tones (MT) while the continent's top two oil producers, Nigeria and Angola, have

Utility PNM has been given the green light for two battery energy storage system (BESS) projects in New Mexico which will support overloaded feeders at two locations. The New Mexico Public Regulation Commission (NMPRC) approved the application from a subsidiary of NYSE-listed utility PNM Resources to build, own and operate two projects ...

The California ISO's (CAISO) Resource Adequacy programme, through which utilities secure capacity from generating units, only requires a four-hour duration for energy storage. Energy-Storage.news has asked CPA for ...

Long-time readers of Energy-Storage.news over the past 10 years will recall that as California's AB2514 legislation put in place a mandate for the IOUs to procure 1.325GW of energy storage between them by 2020, an outsized portion of our reporting was driven by activity in the California Independent System Operator (CAISO) bulk power system.

Augmentation at the Vistra Moss Landing Energy Storage Facility in California has been completed, with the world's biggest battery energy storage system (BESS) now at 400MW / 1,600MWh. ... "The energy storage facility that Vistra is deploying in Moss Landing will help us build a more reliable, low-emission grid,

providing zero-emission ...

The Edwards & Sanborn solar-plus-storage project in California is now fully online, with 875MWdc of solar PV and 3,287MWh of battery energy storage system (BESS) capacity, the world's largest. The 4,600-acre project in Kern County is made up of 1.9 million PV modules from First Solar and BESS units from LG Chem, Samsung and BYD totaling 3 ...

KEPCO, South Korea's biggest electric utility, has welcomed the start of commercial operations at a portfolio of large-scale battery energy storage system (BESS) assets. Report: 75% of battery supply chain at risk of violating US and EU laws on forced labour

, California will be characterised by up to 20-year tolling PPAs or RA contracts of between 10 and 20 years, with merchant upside, and Texas by tolling PPAs over 5-year to 7-year terms. ... Energy-Storage.news" publisher Solar Media will host the 1st Battery Asset Management Summit USA in San Diego on 12-13 November 2024. Featuring a ...

The project supplies power to the City of San Jose, Southern California Edison, Pacific Gas & Electric Co. and the Clean Power Alliance, and Starbucks, among others.

The Valley Center Energy Storage project in Southern California. Image: Terra-Gen. Developer Terra-Gen will now investigate the cause of a fire at its Valley Center BESS in California, with public safety measures lifted and the incident considered "over".
