

Why should you lease a site for a battery energy storage system?

Land is the most important resource for the development of battery energy storage systems. Several factors must be considered when considering the leasing of a site for a BESS project, some of the most important being: The size of the land required for a BESS project depends on the capacity of the battery system.

What is an energy storage project?

An energy storage project is a cluster of battery banks (or modules) that are connected to the electrical grid. These battery banks are roughly the same size as a shipping container. These are also called Battery Energy Storage Systems (BESS), or grid-scale/utility-scale energy storage or battery storage systems.

Why are solar & battery storage lease rates increasing?

The increasing demand for landsuitable for solar and battery storage projects has driven up lease rates in recent years, especially because of the incentives offered by the IRA Renewable Energy. As the industry expands, competition for land is intensifying, particularly in regions with favorable solar and wind resources.

Logistics facilities and warehouses to support the efficient distribution of goods. Search for available warehouse space for lease or development. Explore the location and quality of ...

I have been contacted by a company that would like to build and operate a battery energy storage system on land I own in Central Texas. I am looking for recommendations for an attorney that could review a lease and provide general guidance through this process. Thanks in advance for the replies.
