

Does China's energy storage industry have a comprehensive study?

However,because of the late start of China's energy storage industry,the comprehensive study for the whole industry is very few. We found a review which provided a relatively comprehensive analysis of the technical and economic issue of it. Compared with other studies,its research has a good comprehensiveness.

Why is energy storage industry in China a big problem?

Judging from the present condition, cost problem is the main barrier. And the high performance and high security of the relative technology still need to be improved. Until 2020, energy storage industry in China may not be spread massively and the key point during this period is the technology research .

Are China's Energy Storage Technology Standards perfect?

But the existing energy storage technology standards in China are not perfect,and a standardization system for the whole industry has not been established,let alone testing and approving products according to relevant standards .

What is the energy storage demand in China?

Energy storage demand in China is without a doubt. Currently, China is carrying out the urbanization of centrality, intelligence, green and low carbon. Among them, the application of DG, smart micro-grid, EV, and the intelligent management of power grid all need energy storage , , , , .

Is energy storage a key innovation field in China?

In November 2014,the State Council of China issued the Strategic Action Plan for energy development (2014-2020),confirming energy storage as one of the 9 key innovation fieldsand 20 key innovation directions.

What are the most popular energy storage systems?

This paper presents a comprehensive review of the most popular energy storage systems including electrical energy storage systems, electrochemical energy storage systems, mechanical energy storage systems, thermal energy storage systems, and chemical energy storage systems.
