

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the first European-level tool of its kind and offers energy storage data across a full range of technologies.

The database includes three different approaches: Energy storage technologies: All existing energy storage technologies with their characteristics. Front of the meter facilities: List of all energy storage facilities in the EU-28, operational or in project, that are connected to the generation and the transmission grid with their characteristics.

By enabling more renewable energy integration, storage reduces reliance on imported fossil fuels, strengthens energy independence, and improves resilience against supply shocks, price volatility, and outages. This aligns with the European Green Deal's goals of ...

Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions. Unlike existing databases that focus on specific storage types, this platform surveys and maps a full range of technologies.

Die Europäische Kommission hat offiziell das „European Energy Storage Inventory“ gestartet, ein Echtzeit-Dashboard für Energiespeicher. Das Ziel ist es, alle geplanten und in Betrieb befindlichen Energiespeicherprojekte in Europa ...

The European Commission has officially launched the European Energy Storage Inventory, a real-time dashboard for energy storage. The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

"European Energy Storage Inventory",? ???33,????9,1763? ?, ...

Spletna stran Evropskega inventarja shranjevanja energije ponuja pregled projektov shranjevanja energije v Evropi. Spletno mesto vključuje interaktivno orodje za raziskovanje teh projektov glede na razlicne kriterije, kot so ...

The European Commission officially introduced the "European Energy Storage Inventory" at the beginning of March 2025-a pioneering real-time dashboard, which for the first time enables a comprehensive and transparent overview of the ...
