

Can the Faroe Islands expand its wind turbine capacity?

A possible combination could be to stake on expanding the wind turbine capacity from 18.6 MW to 72 MW in 2030 and supplement with two production methods that are new to the Faroe Islands: gradual expansion of solar parks with a total capacity of 30 MW and a tide plant with a capacity of up to 60 MW.

Is wave energy a source of energy in the Faroe Islands?

A recently published study for the Faroe Islands, Denmark went beyond the now classical RES, wind and solar; exploring other sources such as wave and tidal . In the case of Cape Verde, there is one study evaluating the wave energy potential which highlights the resource available, particularly for the northern islands, such as S&#227;o Vicente .

Can the Faroe Islands convert their energy system to renewable sources?

A number of researchers have studied the conversion of the Faroe Islands' energy system to renewable sources. These studies looked at a single island or more broadly [ 51, 53] and their primary focus was on the techno-economic optimization of the new system.

What are the key innovations in energy planning for the Faroe Islands?

The key innovations of this paper for islands, and global energy transition planning, are: The central incorporation of social perspectives into the energy planning for the Faroe Islands via explicit elicitation of criteria weights of local stakeholders.

How is electricity produced in the Faroe Islands?

Electricity on the Islands is currently produced through a combination of fossil (about 100 MW) and renewable sources (about 62 MW). Fig. 1. Placing the Faroe Islands, inset in red [50 ]. Space heating on the islands is primarily from oil burners and in 2016 made up 24% of the imported oil usage [51 ].

Will Faroese achieve 100 percent green electricity by 2030?

The Island's power company, SEV, has a stated goal of achieving a "100% green electrical energy onshore by 2030." Furthermore, there are incentives in place to encourage Faroese consumers to purchase heat pumps and electric vehicles while the district heating system is also being expanded [53 ].

This paper seeks to expand the understanding of geographic islands' positions and concerns while also helping local planners in the transition to renewable sources through ...
