

Where do fenecon batteries come from?

“We use the batteries that are already available in Europe,” says Fenecon CEO Feilmeier (3rd from left). Fenecon's new factory will produce industrial storage batteries from so-called zero and second-life vehicle batteries. Accordingly, Europe's largest production facility for storage units made from vehicle batteries will be created.

Where is fenecon battery Refactory located?

Fenecon has opened its CarBatteryReFactory. The factory in Iggenbach, Lower Bavaria (Germany), produces large-scale stationary storage systems from new, disused electric vehicle batteries. Production of management systems for home storage systems has also been relocated to the new plant.

Will fenecon increase its capacity with the carbatteryrefactory?

Fenecon will significantly increase its capacities with the CarBatteryReFactory: The company has been manufacturing large containerised storage units from EV batteries since 2017, but only in small-batch production at its plant in Künzing, Germany.

How much does fenecon battery Refactory cost?

The newly named Carbattery Refactory will cost around 22 million euros in the first stage of expansion. Fenecon has already been producing large container storage units from electric vehicle batteries since 2017. Small series production is currently still taking place at the plant in Künzing.

What is fenecon's new factory?

Fenecon's new factory will produce industrial storage batteries from so-called zero and second-life vehicle batteries. Accordingly, Europe's largest production facility for storage units made from vehicle batteries will be created. The EU is supporting the project with 4.5 million euros.

Can fenecon scale up the production of second-life energy storage systems?

As a first mover, the company FENECON has the potential for scaling up the production of second-life energy storage systems in Europe, particularly given the expected increase in the availability of second-life batteries and the growing demand for them to meet the expected growth in the share of renewable energies requiring energy storage.

Ebenso wurde die Produktion des Heimspeicher-Energiemanagementsystems ins neue Werk verlagert, dabei deutlich vergrößert und automatisiert. Die Produktionskapazität der Fabrik liegt bei circa 500 ...

Hallo zusammen, ich habe seit ein paar Tagen eine FENECON PV-Anlage bei mir installiert. Diese besitzt eine Reihe von auslesbaren Schnittstellen. Leider gibt es dazu noch keine Herstellerseitige Integration. Ich habe auf einer anderen Seite eine sehr gute manuelle Einbindung gefunden: Hier kann man beim Auslesen des
