

Will Finland support energy investments in 2022 - 2026?

On 16 December 2021, the Government issued a decree that will allow support to energy investments under Finland's Recovery and Resilience Plan in 2022-2026. The aim is to promote energy investment and energy infrastructure projects that reduce greenhouse gas emissions in Finland and support the country's 2035 carbon neutrality target.

How much funding is available for energy investments in Finland?

The amount of available funding will total about EUR 520 million. The Ministry of Economic Affairs and Employment and Business Finland will announce the first call for applications in the next few days. The Sustainable Growth Programme has specified the following amounts of funding to energy investments:

Does Finland use fossil fuels?

Finland already has relatively low fossil fuel use- they made up 36% of its total energy supply in 2021, around half of the 70% average for International Energy Agency (IEA) members.

Why is Finland a good place to invest in smart energy?

As the world moves into a fully renewable and sustainable future, Finland is the perfect place to research, test and produce smart energy solutions. Finland is a forerunner in the quest for carbon neutrality and smart energy. Already 40% of Finnish energy is produced from renewables. Finland has a goal of being coal-free in 2029.

How has the Finnish energy sector changed over the last two years?

Especially, events during the last two years have brought irreversible changes to the Finnish energy sector and its future prospects. Finland's rapid reduction in the import of Russian fossil fuels, the deployment of a new nuclear reactor, and strong growth in wind generation, just to mention a few examples.

Why is nuclear energy important in Finland?

Nuclear energy plays a key role in Finland's energy sector and is central to the government's goals to achieve carbon neutrality and reduce energy import dependence.

Solar power is currently the fastest-growing renewable energy source 1 in the world. According to forecasts by national grid operator Fingrid, in Finland, solar power generation capacity will increase 10-fold by 2030 2.. At the Lakari solar power plant, Hitachi Energy's power transformer raises the voltage level to the level needed to transmit the electricity produced by ...

SENS (Sustainable Energy Solutions Sweden Holding AB) erbjuder lösningar som möjliggör omställningen mot en fossilfri och CO2-neutral energiforsörjning både lokalt och internationellt. ... SENS förvarar batteri- och underjordiska pumpkraftverksprojekt i Finland. 2 oktober 2024, kl 12:00 | Regulatoriskt pressmeddelande. Sustainable ...

Innovative Sustainable Energy Engineering" is a Nordic Five Tech (N5T) programme. This means that you get to study at two out of five of the most prominent Nordic universities: Aalto University School of Science in Finland, Technical University of Denmark, KTH Royal Institute of Technology or Chalmers University of Technology in Sweden.

Finland aims to be carbon neutral by 2035, an ambitious goal compared to the European Union's target of 2050. To be successful, the Finnish government has approved a plan in which Finland aims to produce at least 10 ...

Finland can offer a lot of expertise for monitoring the state of the environment and assessing the damages, and we can support Ukraine in the clean energy transition. Sustainable reconstruction means an opportunity to also replace the old building stock with more energy-efficient solutions," said Mykkänen.

Finland is a northern country, dark and iced over in the winter; and in the summer, warm and sunny through both day and night. To balance the extremes, the country needs energy and electricity; and to conserve the treasured environment both locally and globally, the climate conscious society envisions, builds and adopts smart energy solutions.

We are currently moving toward an energy system that is sustainable, smart and flexible. The energy transition requires new ways of thinking about energy, including its sources, production, markets, transmission and use. The Master's Programme in Advanced Energy Solutions is an excellent place for you to start reshaping our energy system. Energy ...

Sustainable Energy Solutions Sweden Holding AB (publ) ("SENS" or the "Company") today announces. ... ("SENS" or the "Company") today announces that the Company has acquired 100% of two sub-projects within the energy storage project in Pyhäsalmi, Finland. The acquisition includes an 85 MW battery energy storage system (BESS) and ...

Discover tailored recruitment solutions in Finland's renewable energy, energy storage, and e-mobility sectors with Intelligent Employment. Our deep market expertise helps build strong, innovative teams driving sustainable growth. ... At Intelligent Employment, we offer tailored recruitment solutions for Finland's renewable energy and ...

When completed, the plant would be a big step towards clean energy production and thus a natural part of Oulu Energia's goal of achieving carbon neutrality by 2030. Partner for the project planning is the Finnish P2X Solutions, which is ...

Energy technology company SENS, Sustainable Energy Solutions, has acquired all shares in two sub-projects of the comprehensive energy storage project in Pyhäsalmi, Finland. The acquisition includes...

On 16 December 2021, the Government issued a decree that will allow support to energy investments under Finland's Recovery and Resilience Plan in 2022-2026. The aim is to promote energy investment and energy infrastructure projects ...

. Business Finland is the Finnish government organization for innovation funding and trade, travel ...

Finland leads the charge in maximizing energy use through innovative approaches like waste-to-value, power-to-X clean energy storage solutions, and renewable biofuels envisioning hybrid energy solutions for a cleaner future. Finland's goal to be carbon neutral in 2035, among first countries in the world, sets ambitious

targets for industries ...

Director, COP28 Finland Pavilion, Business Finland [severi.keinala \(at\) businessfinland](mailto:severi.keinala@businessfinland.fi) Tel +358 40 594 9944 . Business Finland is the Finnish government organization for innovation funding and trade, travel and investment promotion. Business Finland's over 700 experts work in over 40 offices globally and in 16 regional offices around Finland.

Building retrofitting initiatives and smart heating solutions are expected to play an increasingly important role in reducing heat loss and energy consumption in Finland. At the same time, improving the efficiency of district heating systems remains a priority, and an area where cutting-edge technologies represent a promising potential.

Finland has also made a noteworthy shift toward clean energy. More than 90 per cent of the energy it generates is already carbon neutral; yet, it has set its sights on doubling clean energy production to build a more robust and sustainable ...

Finland gets 29% of all its energy needs from advanced biofuels. It also has extensive nuclear and hydro networks. But some of its bold targets for continued fuel-use improvement call for sustained government ...

Finland has received significant research funding of EUR 14 million from the EU to speed up the transition to a clean energy system. The REPower-CEST project will produce a comprehensive analysis of the means ...

Finland is committed to achieving carbon neutrality by 2035, focusing on energy security, reduced import reliance, sustainable economic growth, and biodiversity preservation. The updated Climate Change Act, ...

Finland is one of the world's northernmost industrialized nations and Finland's energy consumption per capita and energy needs are high due to its energy-intensive industry, cold climate, and high standard of living. ... renewable energy, energy efficiency, sustainable and smart energy solutions and systems and their related products and ...

Discover Finland's remarkable eco activities that balance environmental preservation and progress. Explore sustainable forestry, renewable energy, eco-friendly transport, conservation efforts, and more. Immerse yourself in a greener future while experiencing the country's captivating landscapes and culture. Plan your sustainable adventure now!

The global energy sector is going through a major transition from fossil-based to zero-carbon energy, with Finland actively supporting the push toward a greener future. A small country on a global scale, Finland has big ambitions to become ...

This year marks a significant milestone for Hitachi Energy in Finland as it celebrates 110 years since the beginning of industrial transformers production in the country. Over the years, the Vaasa factory has become

Finland's largest and most important transformer manufacturing plant, contributing significantly to national energy security.

Finland aims to be carbon neutral by 2035, putting it fourth in the world and ahead of every other country in Europe. ... It makes up 42% of fuel consumption on Finland's roads and its energy intensity rose between 2005 and 2020. In this area, the government sees hydrogen and hydrogen-based fuels as better decarbonization solutions than ...
