With durable construction the OutdoorType 2 power cabinet incorporates tailored thermal systems (fan/filters, air conditioners and heaters) that will keep even the most sensitive electronics functioning in extreme environments.

Outdoor enclosures are subject to wind, rain, snow, ice, dirt and dust, and the equipment must be protected against these elements. It's essential that water does not enter the enclosure, even during abnormal weather conditions. Additionally, an enclosure air conditioner operates on a closed loop cooling cycle, which precludes the use of a ...
