

What is a greenlinx battery?

Greenlinx are the UK's first battery to use High Power Density (HPD) Lithium Cells, which can utilise 100% of the battery capacity (other lithium batteries can only use 90%). This is a battery unit that can easily be retrofitted into an existing solar panel system, or be a part of the design from the initial planning. So it is a flexible system.

Who makes greenlinx battery storage?

Greenlinx are exclusively distributed by Infinity Innovations Ltd. in the UK and Europe. While they are quite recent to the UK market they are by no means new to the battery storage industry. As later arrivals to the domestic battery storage market they have certainly raised the bar in almost all areas of performance and technological development.

Is greenlinx a flexible system?

So it is a flexible system. Greenlinx sells batteries with a capacity of 3.2 kWh per unit. It is easy to link multiple batteries together to obtain the amount of battery storage needed. For example, if the system requires 12.8 kWh of storage, then four batteries will have to be purchased.

Can a greenlinx system be connected to a standalone system?

Please note this is not a standalone product, it can only be connected to a system that already has Greenlinx. This price includes installation. If you would like a quote for this system, please call 0800 156 0191 or simply answer these few questions and we will get back to you with your finance options.
