What is a Y&H 1000W grid tie inverter?

1. Y&H 1000W Stackable Grid Tie Inverter with Power Limiter The Y&H 1000W Grid Tie Inverter converts DC power generated by solar panels into AC power, connecting seamlessly to the grid and supplying the available panel power to the AC load.

How does a grid-tie inverter work?

But in most of the time, it will supplement by grid. The "limiter" looks at the load and then tells the grid-tie inverter to reduce its output to equal the load. As they explain, the purpose of the "limiter" is to get around a smart meter (which charges you for power you export to the grid), by greatly reducing the power sent to the grid.

Which is the best grid tie inverter with battery backup?

Considering the price, then this one among the best grid tie inverter with battery backup is a good option also. The Y&H power limiter inverter has an in-built limiter which is why it is named. This limiter prevents the inverter from supplying excess power to the battery or inverter.
