

Will Guernsey's new electricity strategy come after a long-term deal?

A leading businessman has criticised Environment and Infrastructure's (E&I) new electricity strategy for Guernsey. Jon Moulton said the strategy should come after a long-term deal on power supply has been signed with French energy suppliers. The current deal for electricity supply with French energy supplier EDF is set to run out in 2027.

Where does Guernsey's Electricity come from?

Currently around 93% of Guernsey's electricity is sent through a cable via Jersey, from France. Mrs de Sausmarez disagreed with Mr Moulton's approach and said E&I was not asking the States to approve a second undersea cable at this stage.

Is E&I planning a small windfarm off Guernsey?

Paul Fletcher, from renewable energy company Renew Guernsey, is also concerned about the direction chosen by E&I. He said the E&I proposals for a small windfarm off Guernsey would be very expensive, and in his opinion "not a good idea".

Is a small windfarm a good idea for Guernsey?

He said the E&I proposals for a small windfarm off Guernsey would be very expensive, and in his opinion "not a good idea". Environmentalist and Chamber of Commerce board member Rupert Dorey believes E&I's preferred plan is the best for Guernsey.

Who are CPower & Atlas Copco?

With CPower's expertise in planning and execution and Atlas Copco's state-of-the-art equipment and global presence, the pair are set to further develop new solutions as the world hurtles towards Net Zero.

For more information, contact CPower at: 1001 Fleet Street, Suite 400. Baltimore, MD 21202 . info@cpowerenergymanagement 844-276-9371. CPower Energy is the national leader of grid balancing and

Securing funding and structuring a contract may be the hardest parts of developing new distributed energy resource (DER) projects. Even with the Inflation Reduction Act set to catalyze billions of dollars of investment in renewable energy projects, financial viability - or the perceived lack thereof - has become a bigger barrier to deployment than technology. ...

Artificial intelligence is accelerating data center growth and energy needs--and facilities can reduce costs and earn revenue by managing their electricity wisely. Grid planners have nearly doubled their 5-year load growth forecasts on the back of surging data-center demand. In fact, data centers may account for as much as one-third of the anticipated increase ...

This article first appeared on Utility Dive on Aug. 14, 2024. [Click here to view](#). Even though PJM's capacity

prices hit record highs for 2025-26, they could go even higher or remain elevated unless the grid operator's generation capacity can catch up with its surging demand. PJM Interconnection's record-high capacity prices for next year may send a ...

If you are a commercial and industrial energy user in the APS service territory, you could be earning revenue through its Peak Solutions demand response program. The program pays participants for reducing electric energy during times of high usage on the APS grid. The program is offered through CPower and is a low-to-no-risk,

CPower Energy is a national leader in unlocking the full value of Distributed Energy Resources. We help energy users across the country save on energy costs, while balancing the grid and driving toward their clean energy goals.

Recently released research shows that mounting reliability risks make demand response (DR) increasingly important as the grid transforms. An aging grid dominated by solar and wind power, battered by storms and fires and struggling to supply new needs like EVs and electric heat pumps, needs the flexibility that DR provides. "Paradigms for the generation and ...

New CPower CEO Mike Smith may have backed into the energy industry, but he has since helped move it forward. In his more than 25 years in the sector, he has developed a reputation for driving growth and delivering innovation at some of energy's leading companies. Now at the helm of the nation's largest provider ... Continue reading Mike Smith: Q& A with ...

CEO Michael D. Smith knew CPower was a leading enabler of the energy transition when he took the helm a year ago, but he has since learned the extent of that role. As the nation's largest virtual power plant (VPP) provider, CPower boosts grid reliability while helping customers unlock the full value of their distributed ... CPower Energy provides package services in the Construction and O& M phases of Onshore and Offshore Wind farms by applying an integrated approach of in-house expertise and collaboration with partners.

CPower Energy provides package services in the Construction and O& M phases of Onshore and Offshore Wind farms by applying an integrated approach of in-house expertise and collaboration with partners. We maintain and continuously develop a strong network of partners with whom we work closely to deliver the best solutions to our clients in a cost ...

Collectively, the three agreements with APS will deliver enough energy storage to power an equivalent of 72,000 homes for four hours and enough solar energy to power approximately 24,000 homes annually. Arizona's current energy storage capacity stands at 1GW, with renewable energy accounting for 12% of the state's electricity mix. ...

Securing funding and structuring a contract may be the hardest parts of developing new distributed energy resource (DER) projects. Even with the Inflation Reduction Act set to catalyze billions of dollars of investment in ...

Find company research, competitor information, contact details & financial data for Cpower Energy ApS of Vodskov, Nordjylland. Get the latest business insights from Dun & Bradstreet.

Commercial and industrial customers in parts of Illinois and Michigan can earn revenue by using less energy when the power grid is stressed. Participation in MISO's demand response programs allows organizations to earn financial rewards while providing the grid operator with the resources necessary to maintain reliable grid operations.

The APS Peak Solutions demand response program offers schools, colleges, and universities the opportunity to reduce their electrical energy use during periods of high usage during the summer and rewards them with revenue payments. The education sector has the opportunity to help promote clean energy for all and receive financial incentives for ...

Developers and energy users make more projects pencil out and succeed because CPower identifies monetization opportunities upfront and then optimizes DERs to earn more grid services revenue and increase on-bill savings. We also mitigate risks for owners and operators and end users, so that they can focus on maximizing project returns.
