The Pacific oyster, *Crassostrea gigas*, is one of the most widely cultivated and economically valuable bivalves worldwide (Guo, 2009) 2018, Pacific oyster production in China reached 5.14 million tons, accounting for

36% of the China's total marine shellfish aquaculture production (Tan et al., 2021). Oyster shell appearance is an important economic trait that can ...

A review of pumped hydro energy storage . Taking an energy storage volume requirement of 27 GWh per million people (the one-day-storage rule of thumb estimated above), this corresponds to 3 m² person⁻¹, which is about the same area as a queen-sized bed. The land flooded for off-river pumped hydro is relatively small and can avoid sensitive ...

Li Li, Ao The interplay between divergence and phenotypic plasticity is critical to our understanding of a species' adaptive potential under rapid climate changes. We investigated divergence and plasticity in natural populations of the Pacific oyster *Crassostrea gigas* with a congeneric oyster *Crassostrea angulata* from southern China used as an outgroup.
