Honduras: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

By partnering with Burando Energies, our clients can effectively address these emissions, which are often the most challenging to manage. Our solutions provide a pathway for businesses to extend their sustainability efforts beyond their ...
