Should I put batteries in the stern?

One reason for putting batteries in the stern is the stern has a lot less pounding that is hard on batteries. If you do decide to mount a battery up front for the trolling motor then I would get the higher cost Marine deep cycle. They take the pounding more without damage. As far as needing 24 volts and a third battery I am not sure.

Where should I put my trolling batteries?

More info to base my decision on. go with the 24v 70 - 80# thrust motor. You can place the trolling batteries anywhere you like, but too much weight in the stern will allow the bow to bounce when hitting a wave.
