Nowadays, the cost of energy storage systems per kilowatt hour is less than 0.2 yuan/kilowatt hour. Will the construction of energy storage on the power generation side also usher in a beautiful spring?

What is a levelized cost of electricity storage?

Although useful and actively pursued, a generally accepted definition of a levelized cost of electricity storage, analog to the widespread used Levelized Cost of Electricity (LCOE), does not yet exist. Such a measure could allow for simple verification of the economic viability of certain storage technologies in a given electricity market.
