

How much wind power does Hungary have?

REKK and the Austrian Institute for Technology calculated a technical potential of almost 100 GW and an economic potential of 16 GW for wind power in Hungary. This exceeds by far the set wind energy targets for 2030.

Can Hungarian gas consumption be reduced by 37%?

This exceeds by far the set wind energy targets for 2030. Our study, supported by modeling, questionnaires, interviews and statistical analysis, found that Hungarian gas consumption can be reduced by up to 37% by 2030 compared to the starting value of 2021 without any special efforts. Is border carbon adjustment the right tool for the power sector?

Why did Turkey and Hungary get exemptions for gas payments to Russia?

Turkey and Hungary said they have received exemptions for gas payments to Russia after the United States imposed sanctions on Gazprombank, removing a major hurdle to the gas trade with Moscow.
