

How much energy does Hyperion use?

Hyperion is powered by the 25 kV grid and has four 430 kW engines. When braking, Hyperion recovers energy and therefore consumes half of an electric classic train. Last year, Softronic received a EUR 14 million loan from Raiffeisen Bank for the production of six electric engines for Swedish company Green Cargo.

Who funded Hyperion?

A key contribution for the success of the funding came from Coopénico, Portugal's largest energy cooperative, which covered one eighth of the total amount. Electra Energy, the Greek energy cooperative behind the creation of Hyperion, and Coopénico are both members of REScoop.eu, so there have been in touch with one another for some time.

Will Mirova invest EUR140m in Hyperion renewables?

Natixis Investment Managers affiliate Mirova is injecting EUR140m into Portuguese renewable energy developer Hyperion Renewables to help the company expand.

Where is Hyperion based?

Leveraging a strong origination DNA, Hyperion has diversified into new geographies within the CEE, with a growing presence in Romania among other markets.

Who are Mirova & Hyperion shareholders?

As part of the deal, Raphael Lance, head of Mirova's energy transition funds, and Hélène Dimitracopoulos, Iberia investment director at Mirova, are joining the board of directors alongside existing shareholders Aytea Amandi, Hyperion's CEO, and Pedro Rezende, Hyperion's founder and executive chairman.

What is Hyperion doing with Mirova?

The latest transaction expands on Hyperion and Mirova's relationship which started in 2018 when Mirova acquired a 90% stake in PV Vale de Moura, a 28MW solar project developed by Hyperion in Évora, Portugal.
