How to protect your electric car from theft?

Some devices you can have include CCTV,alarms,and dash cameras,to name a few. You can even apply padlocks on your electric car charger to secure them while your car is charging to prevent it from getting stolen. Compared to ICE cars,Electric Vehicles (EVs) are more complicated to steal due to built-in security features.

Can an electric vehicle battery be stolen?

Theft of an electric vehicle's car battery is highly unlikelyand uncommon due to several factors. Electric vehicle batteries are typically large,heavy,and securely integrated into the vehicle's structure,making them difficult to remove.

Do electric cars get stolen?

Sometimeselectric cars get stolen,but the rate is a lot lower compared to ICE cars. The car thief has to be someone very close to you in order to gain access to the key fob and know your PIN or account password. So,with a little bit of application and security consciousness,you'll never lose your car to theft.

However,electric cars only make up less than 5% of the global vehicle market share,making them all the more prominent targets for theft. Most thieves prefer stealing highly valuable possessions to earn more profit,which is why they target objects like cars.

Do EVs get stolen?

EV manufacturers have built-in a raft of theft prevention measures to dissuade thieves from attempting to steal these cars. Most of the time,the few EVs that get stolen are recovered quickly. EV manufacturers have put up several obstacles in place to make these models less attractive to car thieves.

How to prevent EV car theft?

The best way to avoid EV car theft is to take advantage of existing software solutions put in place by EV manufacturers. As mentioned above, the "PIN to Drive" feature ensures your car won't move if you don't enter the code. On a Tesla, you can activate this function by going to Controls > Safety and Security > PIN to Drive.

If you think your car or vehicle has been stolen, you can report it online or call 105. It's a good idea to check it hasn't been borrowed, towed or moved first. If you want to report it as stolen, it may be faster to complete the report online, depending on demand.

This significantly reduces the incentive for thieves to target electric vehicle batteries, as the search for a buyer for a stolen battery can be challenging. Moreover, the growing availability of battery serial numbers and ...
