## Underwater Robotics

The battery shall be capable of continuous charge at 16.8V, as shown in the graph below. A dedicated level II or level III smart battery charger is required to charge the battery. Using this type of charger, the battery will request appropriate charging Voltage and Current from the smart battery charger.

NH2054HD34 Smart Battery with Battery Management Module and SMBus communication from Inspired Energy. The NH2054 is ideal for low temperature applications as the low internal impedance enables the cells to deliver good capacity and discharge current. The NH2054 can perform as low as -10°C (Note, in cases of low temperature applications, we ...
