

What does an energy broker do?

Before we delve into how to get your feet wet in the industry, let's begin with a quick overview of what an energy broker does. In short, you'll act as the go-between for clients and energy providers, helping your customers lower their utility costs and get the best deal possible for their power needs.

Do you need an energy broker license?

Although many deregulated energy states require an energy broker license, the barrier of entry into the market is quite low. Anyone with a bit of business experience and small financial backing can become an energy broker. Because of this, more and more brokers are getting licensed each year and the competitive landscape becomes more challenging.

How to start an energy brokerage business?

Establish Your Business (If Entrepreneurial): If you aspire to start your energy brokerage business, develop a business plan, secure funding, and obtain the necessary licenses and permits. Focus on building a strong client base, offering excellent service, and differentiating yourself in the market to succeed as an independent energy broker.

Should you hire an energy broker?

While this industry can experience unforeseen challenges, it is also ripe with opportunity. Especially as consumers become more cognizant of the cost of energy and more interested in renewable resources, an energy broker can be an invaluable resource in helping them navigate their options and reduce their utility spend.

Is a career as an energy broker a viable career path?

You're passionate about the energy industry. You follow the trends and know when the market ebbs and when it flows. You're also interested in sharing this knowledge with others, helping them to better understand and make use of the resources available to them. Does this sound like you? If so, a career as an energy broker could be a viable job path.

Are energy brokers a good fit for a career?

Energy brokers also tend to be more "left-brained" and logical, giving them the ability to analyze contracts and look at numbers on a daily basis. If you are unsure about your personality and if you might be a good fit for a career as an energy broker, you might consider taking a personality test.
