Douglas council is to start producing its own sustainable solar energy. The local authority has approved funding for a solar farm to power some of its facilities. The generation facility would be built in Braddan and have a life span of around 20 years. It's thought the savings will mean it'll effectively pay for itself within five to seven years.

The Isle of Man Government has committed to achieving net zero carbon emissions by 2050. Residential properties are the largest carbon emission contributor in the Isle of Man and this is continuing to increase. To be able to deliver the net zero target by 2050 we all need to make changes to the way we live.
